In the claims:

For the Examiner's convenience, all pending claims are presented below. Please cancel claims 1-51 without prejudice.

1-51.   (Cancelled)

52.   (New) A method comprising:

receiving data at an interface from a service;

identifying at the interface whether the data is an electronic mail (email) message corresponding to a user mailbox or address book data corresponding to the user address book;

applying a first set of code words to encode the data if the data is an email message;

identifying a block of data within the email message which is found in a previous email message;

generating a pointer identifying said block of data in said previous email message;

replacing said block of data in said email message with said pointer; and

transmitting said email message to a wireless data processing device having said previous email message stored thereon.

53.   (New) The method of claim 52 further applying a second set of code words to encode the data if the data is address book data.
